Toronto, June 22nd 1998

Dear Mr. Weisberg,

I have sent you several letters in the past regarding the JFK assassination. Would you mind writting to me again? I thank you in advance!

Four years ago. I sent a letter to Arlen Spector regarding some matters. He did reply, furnishing me a document produced by the Congress. The document is indeed about the JFK assassination but had nothing to do with my questions. One of my question is related to what you discovered and published in "Post Mortem". I am talking about a change made from the original hand-written autopsy report to the typed-version of it as it is in the W.C. Volumes.

In Post Mortem, there is a mention of this. The expression "puncture wound" in the hand-written is changed for "a much smaller wound" in the typed version.

To write to Mr. Spector, I would need a photocopy of this from your book.

Would you please send me one?

I talked to you about a plan for transfering Oswald at night by Curry. Did you get any new information about it? Lately. I saw "The men who killed JFK" to which you have contributed. A policeman (you know the one who with James Leavelle was beside Oswald when he was shot? I think his name is Graham or something). He said (as Ellis said) that the plan was stopped by Mayor Cabell!

Do you have a computer? If so, do you have Internet? There are many interesting things about the JFK assass. You could participate to some forums where people ask questions and comment about that. I am sure you would become a popular figure.

Goodbye!

P.S.

You know the Allen J Murray photos showing Buddy Walthers and a unidentified man picking up a bullet off the grass on Elm Street? Have you ever investigated to find out who is this unidentified man?

In 1969, Jim Garrison showed the photos on TV and claimed that the man was an FBI Agent. The FBI made a press meeting to reply to that claim. Do you remember what the FBI said?
